

*Founded in 1953, Weinhold develops fittings for hoses and pipes that do not require any tools or hose bindings for their attachment. Gas, compressed air, water & steam are all serviced by Weinhold. Weinhold fittings can be found in mining, petrochemical and construction industries.*

## Hose Couplings

- No hose binding or clamps required
- No front end seals - hose is the seal
- Safer hose clamping

## Pipe Couplings

- Fast coupling & uncoupling
- No tools required
- Simple but solid design
- Adaptable to heavy duty operation
- No decrease in cross sectional area means free flow of medium
- Bending capability facilitates pipe mounting
- No pipe movement required during coupling & uncoupling process

*Hose fittings for compressed air, water & gas*

*High pressure hose fittings*

*Plug type hose connections for compressed air, water & gas*

*Piper couplings*

*Form A & B low & high pressure*

*Compressed air valve with pressure release*

*Steam Pistol for hot water & wet steam*

**Two jaw band fittings for steam hoses**

**Steam valves with viton sealing ring**

**Union for steam & other fluids**

**Steam valves with scavenger facility**

**High pressure screw type couplings**

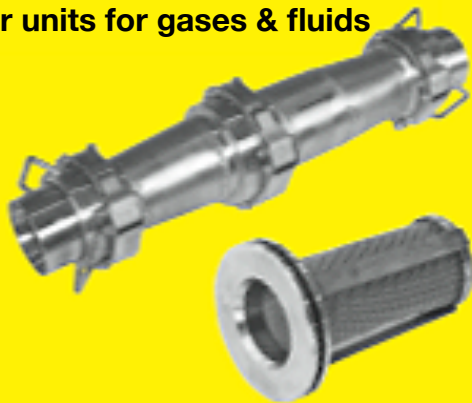

**Filter Equipment for steam gases & fluids**

**High pressure pipe couplings A & B**

**Pipe filter units for gases & fluids**

**Hydraulic hose fittings**

**Spiral Hose couplings**

**Divided flanged joints**

**Construction material pipe couplings**
